With a view to improve the level of cleanliness in rural areas and to impart the necessity of health and hygiene, we undertook the Swachh Bharath Mission launched by the Honourable Prime Minister of India to the village Asoor which is situated 15kms away from the college. With the help of Block Develop Officers and the local panchayat we adopted the village to propagate the need for sanitation, solid waste management and house hold sanitary latrine. It is the matter of great sorrow and regret that people are unaware of the spread of dreadful diseases due to open defecation.

Activities undertaken:

1. We started our awareness campaign at Shri. Murugan Government Aided Primary School, Asoor. With the help of the Headmaster of the school, the children were assembled and our students spoke about cleanliness in order to instil in the young minds the need for health and hygiene. Along with the school children the students of our college went on an awareness rally among the locality raising slogans about eradication of plastics, solid waste management and need for household toilets.
2. Our students displayed posters containing slogans and pictures in the school depicting the need to have a pollution free environment.
3. Pamphlets regarding sanitation, health and hygiene were distributed to the people in the locality to create an awareness.
4. The plastic bags and plastic materials around the school were collected to make the area around the school environment friendly.
5. The students cleaned the thorny area around the school campus and collected the waste and dropped it in dustbin and gunny bags.
